

RECORD OF CONVERSATION

Jason Aguilera
Senior Air Safety Investigator
Central Region

Date: April 25-26, 2017
Person: John Taylor, Manager KVER
NTSB Accident Number:

During the course of the on-scene investigation, I spoke with the manager of the KVER airport, John Taylor, who also ran the FBO. He knew the pilot and he seen him flying in and out on KVER on numerous occasions. On the day of the accident, he was in his FBO office and heard the airplane approaching the airport. He watched as the airplane maneuvered to land on Runway 18. He recalled that the airplane seemed lower than usual. Mr. Taylor stated that the pilot often flew a low final, but this approach was lower than usual, so it caught his attention. He continued to observe the airplane as it approached the airport. He saw the airplane contact the powerlines and nose down into terrain. He called emergency services and responded to the accident site.

Mr. Taylor also commented that the pilot often wore an eye patch over one eye.
