NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

On the morning of 10/04/16, I flew from KPWK to KBUU for altimeter and static and transponder certification at 10:00 to 10:30. The inspection was completed and certified, and log book entry.

Around 2:35 I topped off the tank with an additional eight gallons of gas. Then did the run up and normal pre-takeoff procedure. All was good so I took off for home. About 10 minutes into the flight, I noticed the engine started to run rough. At that time I pulled out the carb heat. It didn't improve anything so I elected to land at Westosha Airport which was below. Upon my approach, I realized I was too high to land on runway 21. I then made a right turn over a cornfield and made another right turn to avoid threes and power lines. I was unable to maintain altitude since the engine had very little power.

I maintained a nose up attitude until the plane sunk into the standing corn. I was unhurt and walked to the road and met with a Kenosha County Sheriff and fire crew. I informed them I was not injured, and the plane was upright, the fuel valve was now off and there were no sign of fire.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

No idea since do not know the cause of engine failure.
