Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Total Loss - Chute Deployed

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed KABQ VFR around 915 AM for KPSO with just myself onboard.

On a heading of 316 to avoid mountainous terrain to the east. Climbed to 10,500 MSL and cancelled with ABQ departure 20 minutes into the flight

At MISSY turned East toward KPSO and climbed to 11,500

When I reached 11,500 MSL the engine started missing and quit

Pulled up the emergency procedures and executed engine restart procedures 2 times

After second attempt called mayday on 121.5 and located nearest airport distance

Decided the nearest airport was not obtainable, turned to the east away from mountain terrain and tried restart procedures again

With no acceptable landing area and losing altitude to deploy the chute pulled the cover off the chute, looked for a suitable area, reviewed the chute procedures and pulled the chute

Once on the ground safe and with no injuries called the FAA to cancel the mayday. I let the FAA know there was no need for emergency assistance and no injuries
