NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

We arrived at 4K3 at approximately 10:30am, I did my walk around preflight which included checking oil which was at approximately 10, and removing Pito and cowling covers. Checked pito tube, and flipped stall switch for free movement. I Completed walk around, and sumped all three fuel sumps, fuel was dumped into my Gasoline powered tug. Tanks showed approx 25 gal fuel / side Pulled plane from hangar and talked with airport manager for a few minutes. We were leaving 4K3 to go to KOZS Camdenton approximately a 40 min Flight. Wind was completely calm we loaded up my log books as we were taking plane for a scheduled annual, a car seat my flight bag, started plane and headed to run-up area proceeded through run-up and everything checked out fine Mags good, carb heat responded, prop cycled and every instrument and gauge were checked and working properly fuel tank selector was already on the fullest tank. Checked to see if all were buckeled in door locked and we announced we were going to taxi runway 21 for departure on 04. Turned on strobes and fuel pump and proceeded to end. Turned on end, Called on radio and announced 4376V departing 04 Lexington prop and mixture were full forward as I added Full power everything responded fine I have a habit of glancing at the oil pressure gauge as I'm rolling and it was fine in the green. We lifted off fine and started our climb and all at once it was like the engine lost all power and I remembering hollering I've lost power, I lowered the nose and knew instantly I didn't have enough runway to get stopped as 04 runway has a big drop off and a ditch at the end of it, I veered slightly to the left and heading for the open field I remember thinking keep the wings level keep the wings level and then it was over that fast. No one had a scratch and we opened the door and got out, as I was afraid of a fire starting. There was no Pop or crackel or roughness from the engine what so ever that I heard, and I ask the airport manager whom witnessed the whole thing if he heard any pop and he said all he heard was the loss of power. We just lost most or all of the RPMs 10 seconds more we would have been in the trees at the Levee I believe departure was probably at about 11:00 or a little sooner.
