See included pages for narrative

On November 23, 2016 my non-pilot husband and I left Hutchinson, Kansas KHUT at 8:27 local time in N7392Q, a Cessna 182. Our destination was New Braunfels, TX KBAZ and we carried 60 gallons of fuel so I decided to make a fuel stop about halfway, choosing Bridgeport, Texas KXBP as my halfway point. The flight was through scattered clouds at 4000 with gradual clearing. Conditions at KBAZ were forecast for steadily improving VFR. We landed at KXBP and added fuel, then called FSS for an IFR clearance to KBAZ. There was another airplane waiting for take off which pulled aside on the taxiway to make way for us to depart. Two other airplanes were calling in radio reports for touch & go landings at Bridgeport. At about 17:09 Z our Cessna 182 made a normal take off until about 200 feet AGL. The engine suddenly stopped completely, I checked that the mixture was full rich, tried to restart the engine, and I only had time to make a radio call of Mayday Mayday, Mayday. We could see the end of runway 36, followed by a fence, a cow pasture, another fence, and a row of trees. I believed my only choice was to try to put the airplane down as straight ahead, level and slow speed as possible. It is my recollection that we bounced hard in the pasture and then hit the tree row.

I blacked out at impact, but regained consciousness soon after, finding my husband trying to free my trapped right foot while fuel poured out of the right wing. He pulled my foot free and two men ran toward the airplane and pulled me out & away. My husband was able to exit on his own. We were then taken to John Peter Smith Trauma Center in Ft. Worth, TX.

Flight from Hutchinson, Kansas to New Braunfels, Texas

Stopped at Bridgeport, Texas (approximate mid flight) for fuel. Had excellent flight to that point with good landing at Bridgeport Airport. Taxied to fuel pump without incident. Took on fuel.

Taxied back to runway with short wait prior to take off. Take off proceeded uneventfully. Plane engine ran smoothly and proceeded for normal takeoff. After liftoff all appeared normal, gained altitude normally until we were near end of runway. At that time the engine ceased to function and immediately began to lose altitude. Pilot was able to keep plane out of a dive. Landed very hard in grass and then hit trees.
