Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Hull cracked, wing supports bent

NARRATIVE HISTORY OF FLIGHT *(Please type or print in Ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed Kitty Hawk Flying Field at 19:15 for a local flight east of the airfield. I entered a left hand traffic pattern for runway 14 and performed two low approaches along the grass, the landing gear was retracted to simulate water landings. I switched to a right hand traffic pattern for runway 32 and performed one more low approach. After turning on my crosswind leg at about 300 ft AGL, the engine started to sputter, I immediately turned back to the airfield. After that, the engine completely failed and propeller stopped. I set up for best glide speed, but it was obvious that I would not clear the hangers. There was an open space to my right and I set up to land on it with my landing gear still retracted to minimize rollout distance. The landing was hard enough to crack the hull, damage the wings and injure my back and neck. No damage to any property or persons on the ground. Weather at the time was clear with light winds using Foreflight software.

RECOMMENDATION (How could this accident/incident have been prevented?)
