Brent Hunninghake [REDACTED]			
SUBJECT			
Spraying North & South, I was making a turn after spraying to the North, I started spraying to the south & engine started losing power relatively fast. I turned spray off & pulled up & just that fast the engine "popped" and lost everything. Shortly after it fired and revved up full steam & "pop" lost everything. Engine now locked up, the blades kept turning just lost complete power. I set it down in a pasture south of the field I was spraying. was my only option. Unfortunately there was terraces as soon as I set it down. Rock the terraces out then plane spun around and came to a stop. Looked out and fuel was dripping everywhere, so I jumped out and ran. Looked back and noticed motor was pulled off laying on the ground. Plane ran over top of engine, that's what did all the damage to the airplane. Happened at 11:45 AM on April 17			
CONCLUSION, ACTION TAKEN, OR		April 18, 2017 10:50 A.M.
