Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

On glide to/and landing, damage to wings, tail, gear, pod, engine compartment, and engine. Property damage to light pole, fence, and field. Inflight flame out of exhaust stack noticed by witness on ground. Upon landing, engine compartment fire. Extinguished by pilot with handheld cockpit extinguisher. Then fire department arrived to treat aircraft.

Want to inform you that I am in possession of the ELT from 9714B. Responding Sheriff had Deputy shut off ELT and disconnect it because it was going off. Turned off the unit and placed it on the pilot seat. Martinaire pilot who went and collected the books and manuals from the aircraft took it from the seat and brought it back to Addison. It is sealed and quarantined.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

PILOT REPORT AS SUBMITTED TO MARTINAIRE

On Monday, July 3rd at 6:05 PM, I was departing Alpine TX airport (E38) on runway 01. The weather was, wind from 340 at 10kts, scattered clouds at 3600, broken at 6000 temperature 20 degrees celcius dewpoint 15 degrees celcius and altimeter 30.26.

During the climb out, at 300ft. AGL I retracted the flaps from 20 degrees to 10 degrees, airspeed was 85kts. I continued to climb and when the flaps had retracted, I began a right turn from heading 010 to a heading of 090. During the turn I heard a loud pop sound and a squealing/screeching noise from the engine. I immediately felt the loss of power. I released the back pressure on the controls and pulled the prop control to feather. At this time I began looking for a place to land the airplane. I saw runway 23 in my peripheral vision and also the hiway (hwy 118). In front of me I saw trees, a fence and railroad tracks. I thought my best option was the hiway, and continued the turn in hopes of making the hiway or the runway. As I turned the altitude was dropping too fast to make the hiway. I noticed what looked like a lane between a house and a fence. With power lines across the hiway, this looked like the best choice. I lined up on the lane and noticed a power pole in the middle. I steered to the left of the pole (the house was to the right), to put the airplane between the pole and the fence. At this point I reached for the flap lever to engage full flaps.

The airplane struck the ground at about a 30 degree angle to the ground, approximately 50 feet from the pole. The right wing struck the pole about 10 feet from the fuselage. The force severed the pole and turned the airplane to the right. The tail of the airplane hit the fence as it turned. Then airplane continued to slide sideways across a driveway and the left wingtip struck a second power pole before coming to rest in the field.

Flames were coming from the engine compartment, and fuel was running out of the right wing. I opened the right door and climbed out of the cockpit. I grabbed the fire extinguisher and put out the fire. The fire continued to flare up and at this time people from nearby took fire extinguisher to keep the flames down.

I was taken to Big Bend Regional Medical Center by ambulance.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Aircraft engine. Pratt & Whitney PT6A-114A Sn PCE-19373.

On climb out, pilot and ground witness reported a "bang" followed by flame coming out of the exhaust stack.
Then loss of engine power.
