NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On July 18, 2017 at approximately 6:00 P.M. I took off from Hurst Airstrip in N816FF with my first load of fertilizer for the day. After a non eventful load I flew the half mile back to Hurst Airstrip. At about 100 FT I began a power reduction and initiated a circle to land to the west towards the airstrip. As soon as I decreased the throttle I noticed the torque starting to increase. Not knowing what was going on I elected not to land toward the west because there were obstructions at the end of the airstrip. I then informed base by radio about the situation and then I noticed the prop RPM was 710. I immediately looked at my levers and pushed the prop lever all the way forward. I then flew the half mile west and on the north side of the airstrip hoping to land to the east knowing I had a bean field to go in if I couldn't make the turn. After turning south and crossing the gravel road I knew I wouldn't make it and initiated a landing into the bean field trying to get straight with the bean rows. The plane was unable to produce enough power and the left wing dragged the ground making the plane skid sideways to a stop.
