

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Tahlequah State: TX

ZIP: 74464 Country: USA

Latitude: 35.93 N Longitude: 95.00W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 07/30/17 Local Time: 18:50
mm/dd/yyyy

Time Zone: central

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: 786MD

Manufacturer: Piper

Model: Malibu Mirage PA46 350P

Serial Number: 4636156

Year of Manufacture: 1998

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 4300 lbs

Weight at Time of Accident/Incident: 4000 lbs

Number of Seats: 6 Flight Crew Seats: 1

Cabin Crew Seats: _____ Passenger Seats: 5

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
- ☐ Aerobatic
- ☐ Balloon
- ☐ Commuter
- ☐ Transport
- ☐ Utility

Special

- ☐ Restricted
- ☐ Limited
- ☐ Provisional
- ☐ Special Flight
- ☐ Experimental
- ☐ Special Light-Sport
- ☐ Experimental Light-Sport

☐ Certificate of Authorization or Waiver (COA)

☐ None

☐ Unknown

Landing Gear

(Check all that apply)

☒ Retractable

☐ Tricycle

☐ Tailwheel

☐ Amphibian

☐ High Skid

☐ Emergency Float

☐ Skid

☐ Float

☐ Ski

☐ Hull

☐ Ski/Wheel

☐ Other Launch/Recovery System

☐ None

☐ Unknown

Engine Type (Select one)

- ☒ Reciprocating
- ☐ Turbo Shaft
- ☐ Turbo Prop
- ☐ Turbo Jet
- ☐ Turbo Fan
- ☐ Electric
- ☐ Liquid Rocket
- ☐ Solid Rocket
- ☐ Hybrid Rocket
- ☐ None
- ☐ Unknown

Fuel System Type (Reciprocating)

☐ Carburetor ☒ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Rated Power ☒ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)
Eng. 1	<u>Lycoming</u>	<u>TIO 540 AE2A</u>	<u>RL 6575 61A</u>	<u>unknown</u>	<u>350</u>	<u>1649</u>	<u>119</u>	<u>Top 198</u>

Last Inspection Type

- ☐ 100-Hour
- ☐ AAIP
- ☒ Annual
- ☐ Continuous Airworthiness
- ☐ Conditional Inspection
- ☐ Unknown

Date Last Inspection: 07/01/16
mm/dd/yyyy

Airframe Total Time: 4103.7 hrs

hours measured at (Select one)

☒ Last Inspection ☐ Time of Accident/Incident

Type of Maintenance Program (Select one)

- ☐ Annual
- ☐ Conditional (Amateur-built only)
- ☐ Manufacturer's Inspection Program
- ☐ Other Approved Inspection Program (AAIP)
- ☐ Continuous Airworthiness
- ☐ Other, specify: _____

Description of Fire Extinguishing System

- ☐ None
- ☐ Specify: _____

Propeller 1

- ☐ Fixed Pitch
- ☒ Controllable Pitch
- ☐ Ground Adjustable

Manufacturer: Hartzell

Model: HC-13YR-1E

Propeller 2

- ☐ Fixed Pitch
- ☐ Controllable Pitch
- ☐ Ground Adjustable

Manufacturer: _____

Model: _____

ELT Installed: ☒ Yes ☐ No

If Yes:

ELT Manufacturer: Artex

Model or Part No.: 110-4

TSO No.: ☐ C91 (121.5 MHz) ☒ C91a (121.5 MHz)
☐ C126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☒ Yes ☐ No

If activated:

Did ELT Aid in Locating Aircraft? ☐ Yes ☒ No

If not activated:

- Indicate Reason:
- ☐ Impact Damage
 - ☐ Fire Damage
 - ☐ Battery Expired/Damaged
 - ☐ Unknown

Additional Equipment (Check all that apply)

- ☒ ADS-B
- ☐ Airframe Parachute
- ☐ Angle of Attack Indicator
- ☒ Autopilot
- ☐ Data Recorder
- ☐ Electronic Flight Bag or Handheld Device
- ☐ Electronic Multifunction Display
- ☒ Electronic Primary Flight Display
- ☐ Handheld GPS
- ☐ Heads Up Display
- ☒ Onboard Weather
- ☒ Satellite Tracking Device
- ☒ Stall Warning System
- ☐ Video Recording Device
- ☐ Other, Specify: _____

☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☒ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Total loss per talks with those involved. Right wing came off after hitting a hay bail. Nose wheel never locked on approach so entire nose section impacted ground. Engine was already a complete loss before impact. All control surfaces were bent and entire airplane was on belly after stopping.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed Joplin (KJLN) at 18:06 central time with no issues. Contacted departure and set up VFR flight following With Kansas City Center shortly after takeoff. Was cleared direct to Addison (KADS) and continued climb to desired altitude of 12500. Leveled off and adjusted controls to cruise flight. About 10 minutes later, there was a slight change in the sound of the engine. I noticed the TIT temps reducing very fast and continued for the next half minute or so to monitor all the other gauges and slightly adjusted the fuel flow to see if that had any effect on the temps. Looked for other irregularities. Sound change in engine and quick shake with engine knock made me look up nearest airport and turn immediately on that heading. I then contacted Fort Worth Center, which was who I was talking to at this time, that I had engine trouble and that I had turned toward the nearest airport in the area which was Tahlequah Municipal (KTQH). I left the controls at roughly cruise flight settings thinking that any major change in power settings would make the problem worse. Shortly after turning towards KTQH the engine made several loud noises and started running extremely rough. Engine oil started covering most of the cowlings and windshield. I let Fort Worth Center know that the engine was still running and that I was trying to maintain as much altitude as possible while the engine was still running. I believe I was about 10-12 miles from the airport when the engine was preparing to quit altogether. The tower asked me how much fuel was on board and how many souls were on board. I remember saying 4 souls and 75 gals but we took off with 75 gals so we obviously had less than that at the time after 30 minutes or so of flight time. I remember trying to maintain altitude as the engine continued to run rougher and rougher with several loud knocks at various times. Shortly after that more oil covered the front window and the engine stopped running. Fort Worth Center was giving me heading and distance to the airport at various times but I could not see very well out the front and could not find the airport visually. I was still tracking via GPS and knew we were headed right at it and knew distance to airport. I hit best glide speed of around 90 knots after the engine quit and continued to fly towards airport. The cockpit started filling with smoke and I started turning most of the electrical equipment off as well as the fuel. After there was a considerable amount of smoke in the cockpit I told the passengers to open their mouths and I dumped the cabin pressure to try to alleviate some of the smoke and not pop any eardrums in doing so. I remember thinking and feeling confident that if we made sight of the runway we would be fine as I was prepared to do a power out landing. We flew directly over the airport and I could not see the runway. I turned off to the right to see if I could spot the runway out my left window and it was right below us on our left side. I started to circle the south end of the runway and put the landing gear down. I got green lights on the two mains but no indication the nose gear was down and locked. I continued to circle and pulled the hydraulic circuit breakers and the manual gear extension handle and tried to get the nose gear to lock manually. It never did lock and I had to get back to flying the airplane as we were getting closer to the ground. I was expecting a nose gear up landing on the runway at this point. As I continued to bank left for an approach to runway 35 at Tahlequah, the airplane was shaking more and more and pulling to the right. Each time I put left bank and rudder into the turn in would shake and pull right and I would level the airplane off some and then go back to banking left. I remember thinking it was not going to get all the way back to the runway and I was looking for other options. I noticed a road off to the east of the airport but it had heavy traffic. I then thought I would land on the taxiway if I could get turned that far. I was still turning towards the field and taxiway in a fairly standard bank when I determined we would not make it that far. We were over a fairly smooth field from what I could tell and I told the passengers we would not make the runway and to hold on as it would be rough. I leveled the wings and applied back pressure to pull the nose up slightly. The nose rose up before impact and we hit first of the main gear before bouncing back into the air. I recall trying to keep back pressure through the entire impact to keep the nose up as much as possible. We bounced a few times and then came to an abrupt stop. After coming to a stop I asked if everyone was OK and turned the master switch off. My wife, in the front seat with me, hopped in the back and opened the door. I turned around and help the two passengers in the back get out as they were still buckled but were on the floor between row two and three. I flipped their legs out the door and my wife helped them out the door. I then was last out and we all congregated 30 or 40 yards from the aircraft as we were not sure about the fuel situation since a wing had hit a hay bail in the field and taken the right wing off. I never noticed a fire but the fire department said they saw a small one in the engine compartment. There was no damage to any other property and all on board had no injuries to speak of.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Not sure it could have been prevented but I have thought over and over about what I may or may not do different. Instead of circling I may have just done a downwind leg and landed on runway 17 instead. However, I knew there was a field on the south end of the airport and I had no idea what was at the other end. I believe if the landing gear would have come down with no issue I would have not been distracted for the few seconds I spent trying to get the nose gear down and locked. I think if it was merely a dead engine, we would have rolled out on runway 35 with no issue. However, with very limited vision out the front window, smoke in the cockpit, landing gear issues, and a strong vibration and pulling to the right, I think walking away was about as good as I could do on that day.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Not sure where the malfunction started, but I would consider it to be a turbo charger issue or complete engine failure. The manufacturer and serial number of the engine are listed earlier in the report.
