NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

My adult son George and I were returning from Osh Kosh WI to Brunswick, Maine (KBXM) on Sunday, ~~At~~ July 30, 2017. we were flying my recently restored Hecrosport II and conducting multiple legs and refueling stops on our journey. At approximately 5pm we refueled at Smith Field (KSMD) and planned our next leg to Holmes County (106) in Millersburg OH. Approximately 15 miles from our destination, 1:15 into the flight, I dropped down from 3500' to 2500' to prepare for our landing. When I added power to level off the engine began to run noticeably rough and my son commented that something felt wrong. I immediately turned on the carb heat and observed no improvement as the engine continued to lose more power and sputter. We were both immediately aware that there was a field beneath us that would be our only option for a forced landing. While continuing to troubleshoot my engine problems, I made for the field. Once at low altitude I began to notice the pronounced undulating nature of the field which gave me concern and difficulty choosing a good spot to land. I knew I needed to make a choice quickly as I was losing altitude and airspeed and room in the field. I finally chose an upslope toward the end of the field having exhausted all efforts to regain climb power. The aircraft fell a short distance and crested the hill, briefly regaining flight.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

We touched down again just at the edge of a deep field of soybeans on a downhill slope. The aircraft decelerated rapidly and carried upright through the soybeans for approximately 100 ft before it flipped forward on the propeller and came to rest upside down in the field. My son and I were able to crawl out of the airplane without difficulty. We called 911 immediately.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
