Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Destroyed Prop. Rudder, vertical stabilizer, minor damage Cockpit, wing tip.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

It was my fifth load of the day, in an air tractor 401. I had 200 gallons in my hopper. The plane had been running flawlessly. I started hearing a tapping noise, in the top of a turn. I checked my gauges, oil pressure, oil temperature, cylinder head temperature; all was normal. I started looking around in the cockpit for something loose, and tapping. I made another pass. All seemed well except for the tapping sound. As I started my next pass I smelled oil. A split second later, a bang came from the engine. My altitude was 10 feet and my airspeed was 130mph. I pulled up slowly to gain a safer altitude. The engine was surging to the point it felt it was shutting down, and it wasn't producing any power. I fire walled the propeller and manifold pressure. The surging didn't subside. My airspeed had bled off, to around 90mph. I had gained 100 feet of altitude. I dumped the load, and looked for a safe place to land. My airspeed bled down to 75 mph quickly. The engine was still surging, but producing no power. Just before stall I realized this was where I must land the plane. I put the nose down, pulled the manifold pressure, propeller, and mixture back. Started to introduce as much flap as I possible, and pointed the nose to the best available option. I touched the top of the weeds at 65 mph with the tail extremely low. Once my booms and wings entered the weeds the plane started decelerating extremely fast. I kept the stick back, in my gut, and stayed off of the brakes. Because of the thick weeds and soft sandy ground, the nose of the airplane was pulled down until the nose hit the ground and over it went.
