NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed LOU(Bowman Field-Louisville, KY) at approximately 8:15 in route to PWA(Wiley Post-OKC) with a refueling stop at MNF(Mountain View, MO). I was flying with VFR Flight following.

Approximately 1-1/2 hour after departure I felt a jolt in the plane as if the plane had hit something (bird, drone, etc?). As I was checking to look for any external damages, the front cowling "oil check" access flew open and the entire front cowling expanded as if it was going to come off but did not, the latches held it on. It appears the loss of the propeller caused the plane to jolt and the engine destroyed itself operating at high rpm after the impeller came off.

I notified KC Center I had complete engine fail and requested the nearest airport. The nearest airport was Carbondale, IL 20 miles from my current condition. I could only cover 10 miles at the current altitude so I start to select a place to land. I chose a grass waterway between to orchards as best place and proceeded to land there. As I approached the select site I was too high so I initiated "S" turns to loose altitude. In the process of making "S" turns I hit a tree and lost control of the aircraft.

The next thing I remember is waking up in a hospital.
