RE: Pilot Statement

I departed Columbia Regional a little before 5pm for Washington Municipal. After a routine "run up" and climb out I reached my cruising altitude of 3,500 and configured the aircraft for cruising. Approximately 10 minutes later there was a sudden loss of power from the engine. I immediately turned the fuel pump on and switched fuel tanks but there was no response. Then I tried to retract the landing gear and there was no response. I was using flight following and notified Mizzou Departure of my engine failure. I then proceed to try and trouble shoot a few more items but all were unsuccessful.

At this point I was losing altitude pretty quickly and focused my attention on trying to find a suitable place to land the plane knowing that it would be a gear up landing. I did not feel I had time or the attention to try and manually pump out the landing gear. A farmer was harvesting a nearby field and I decided that was where I was going to attempt the landing. I was able to land the aircraft in the harvested field.
