Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop strike, airplane flipped over, damage to wings, wing struts, vertical stabilizer, engine cowling, fuselage twisted.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Prior to arrival at KAEG, I obtained the ATIS that said wind was 140 degrees at 15. I contacted AEG tower, gave them my position, altitude and intentions. The tower controller said to expect a right base to runway 17. A few moments later he came back and told me that winds were now 240 degrees at 17 gusting to 25, and were favoring runway 22 and to plan a right downwind entry for 22. Subsequently I was cleared to land on 22. Upon touching down the aircraft encountered a strong gusty crosswind, after which I lost directional control of the aircraft. The aircraft veered left and exited the runway surface and flipped over.
