Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The tips of both Right and left wing had damage. The nose gear and right gear collapsed and the front tire was taken off, The prop had damage as well.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

While flying from Fort Morgan airport (KFMM) to Greeley Colorado airport (KGXY) the pilots listened to the weather report and decided that the winds, 130 at 5 knot favored runways 17. The pilots then decided to enter a midfield for left downwind 17. PIC (1) ran through the landing checklist. Turning from base to final the plane appeared to be on glide slope according to the two red and two white lights. PIC (1) said to the other PIC that the plane was on glide slope and airspeed was good. As the plane approached the runway PIC (2) told PIC (1) to land on the threshold markings. As the plane approached the threshold markings the PIC (2) said we are still high and slow so PIC (1) made a power adjustment. The plane floated a little longer from the threshold markings where the PIC (1) initiated a go around both verbally stating and pushing full throttle. There was confusion as to whether the plane touched down briefly or not. As the plane began to climb PIC (2), without verbally saying anything, applied downward pressure on the yoke. PIC (1) was still in control of the aircraft trying to climb. There were two pilots on the controls correcting the controls with dual controls caused a miscommunication. The plane was a few feet off the ground when the left wing then clipped the ground and the plane went off the side of the runway. The front landing gear collapsed and the plane landed on the right wing. The plane came to a stop and the pilots turned off the fuel, avionics, mixture, and aircraft. There were no injuries to either pilot and no fire.
