

RECORD OF CONVERSATION

John M. Brannen II
Senior Air Safety Investigator
Central Region

Date: 11/28/2017
Person Contacted: Jeff Miller
NTSB Accident Number: CEN18FA037

Narrative:

Spoke with Mr. Miller, who is the property owner where N4676L crashed on 11/23/17. I asked him about the weather conditions on the night of the accident and he told me that it was "not a pretty night". It was moist and drizzly. He was returning from a nearby town about 5:30 pm, about 30 minutes after the accident and he noted some fog rolling in. He said it was not "pea soup", but there was some fog. He noted that he could see the lights reflecting off of the base of clouds in the area.
