Subject: Information Regarding Crash of N68640 (Quentin Aschoff)

I am a pilot based at KEIK and the evening before this airplane departed on the flight resulting in a crash I met and helped the pilot push his plane back onto the taxiway after his left brake locked up. We had a short discussion about how neither he nor his plane had flown in over a year. The next day I was also witness to an extremely long run up, approximately 15 minutes. He eventually departed KEIK after that run up and the next I heard was that he was missing.

Feel free to contact me regarding further details.

Thank you,

Kristopher Kendall
