August 10-2018

In June 2018 I advertised a Fisher Celebrity airplane (228LC) for sale. Robert D. Askins and a friend call me and the next day came to my airport(ii09) to see the plane.

They inspected the plane and did a compression check on the engine. Mr Askins told me he was a tail flying pilot, and would like to fly the airplane. I checked the fuel and oil and he did fly the airplane around my field.

We made a deal on the plane and a few days I received a check in the mail. We talked about the plane over the phone and decided that we would fly the airplane to Madison, IN. (IMS) on July 4-2018.

Mark Mackenzie had flew the plane and made at least 12 landings and take offs. Mark had flew his grand kids in the plane.

Mark flew the plane to Madison, IN on the 4th of July 2018 and told Mr. Askins about the landing speed etc.

We fueled our planes and took off for home. GOD SPEED.
