National Transportation Safety Board
4760 Oakland Street, Suite 500
Denver, CO 80239

ACCIDENT # 0156 INDIVIDUAL#: 001 NAME: [REDACTED] MODE: AVIATION
DATE OF ACCIDENT 08/16/2018 DATE RECEIVED 08/21/2018 PUTREFACTION: No
N # 2893Q NTSB # CEN18FA336 CAMI REF # 201800156001
LOCATION OF ACCIDENT Rhome, TX
SPECIMENS Bile, Blood (Subclav.), Brain, Gastric, Heart, Kidney, Liver, Lung, Muscle, Spinal Fluid, Spleen, Urine, Vitreous

FINAL FORENSIC TOXICOLOGY FATAL ACCIDENT REPORT

CARBON MONOXIDE: The carboxyhemoglobin (COHb) saturation is determined by spectrophotometry with a 10% cut off and confirmed by chromatography.

- NO CARBOXYHEMOGLOBIN detected in Blood (Subclav.)

CYANIDE: The presence of cyanide is screened by Conway Diffusion, when the COHb level is equal to or greater than 10% or upon special request. Cyanides are quantitated by spectrophotometry and confirmed by chromatography. The reporting cutoff for cyanide is 0.25 ug/mL. Normal blood cyanide concentrations are less than 0.15 ug/mL, while lethal concentrations are greater than 3 ug/mL.

- NOT PERFORMED

VOLATILES: The volatile concentrations are determined by headspace gas chromatography at a cut off of 10 mg/dL. Where possible, positive ethanol values are confirmed by Radiative Energy Attenuation.

- 154 (mg/dL, mg/hg) Ethanol detected in Blood (Subclav.)
- 177 (mg/dL, mg/hg) Ethanol detected in Vitreous
- 194 (mg/dL, mg/hg) Ethanol detected in Urine

DRUGS: Specimens are analyzed using immunoassay, chromatography, mass spectrometry, or spectrophotometry. Concentrations (ug/mL) at or above those in () can be determined for, but not limited to, the following drugs: amphetamines (0.010), opiates (0.010), marijuana (0.001), cocaine (0.020), phencyclidine (0.002), benzodiazepines (0.030), barbiturates (0.060), antidepressants (0.100), and antihistamines (0.020). Drugs and/or their metabolites, that are not impairing or abused, may be reported from the initial tests. See the CAMI Drug Information Web Site for additional information (<http://jag.cami.jccbi.gov/toxicology/>).

- 0.0033 (ug/mL, ug/g) Delta-9-THC detected in Blood (Subclav.)
- 11-Hydroxy-Delta-9-THC NOT detected in Blood (Subclav.)
- 0.0094 (ug/mL, ug/g) 11-Hydroxy-Delta-9-THC detected in Urine
- 0.0139 (ug/mL, ug/g) Carboxy-Delta-9-THC detected in Blood (Subclav.)
- 0.0346 (ug/mL, ug/g) Carboxy-Delta-9-THC detected in Urine

Friday, November 16, 2018
