Driving west on highway and observed small airplane flying low cross the highway in front of my vehicle. I assumed he was trying to land on a private airfield. The plane came down slowly and hit the ground hard in a pasture flipping over onto its top. Stopped to render aid and observed the pilot coming out of the plane under his own power. Myself and other bystanders helped the pilot away from the aircraft.

I was riding my horse, late morning on Friday, and saw a plane come from the north, he was flying low and the engine sounded like it was going in and out (turning on and off.) he flew over where I was and it continued to turn on and off and then it got lower, he turned east and then turned around completely and started landing. I ran down on my horse and he was already crawling up and several other people were walking over to the crash site. 3-5 mins later emergency response was here.

I have read the above and foregoing statement and know the contents thereof and certify that the same is true and I am signing it voluntarily of my own free will.

My husband and I were traveling N on 287 and
out of the corner of my eye on the left of 287
I noticed a small plane that looked as though it

there was an airport near here that I hadn't seen.
We watched as the airplane came down lower,
crossed the highway and crashed in the field.
We stopped and called 911.
