Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

No damage to aircraft or property.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Helicopter departed Southland Field (KUXL) at approximately 8:08 AM and landed at a construction site LZ about 10 miles to the north. A safety briefing was conducted with the construction crew regarding the daily work procedures. At approximately 9:38 AM, while conducting a Class B external load operation to install a rope guard between the center and outside phases of a 500kV transmission line, with two crewmen suspending from a 60' long-line, the long-line contacted the overhead static wire and was severed. Both crewmen fell and sustained fatal injuries.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

When there is a possibility of contact with the structure or conductor during any HEC longline operation, all of the following must be considered:

- o Alternative work procedures that eliminate the possibility of the longline rubbing on an object
- o Protection of the synthetic longline by use of an abrasion resistant cover
- o Metallic longline
