Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Substantial damage to nose and cockpit of aircraft. Tubular framework broken near windshield, fuselage, tail empanage, right elevator and wings. Engine broken off engine mounts. One propeller sheared off in flight and 2 remaining blades shredded/delaminated. The 3 main wheels and tail wheel are broken off. ELT found on ground approximately 10 feet from plane. Yoke on right side broken. Plane crashed into a ravine in a field. No property damage noted.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Sunday, 11/05/2017, I, William J. Linn as pilot, took Alan L. Drennon, the aircraft owner of N618ER, for an intended flight around the pattern at 02KS to see if we would be clothed warmly enough for an eventual flight to Lyndon, KS (Pomona Lake) This was where the aircraft was to be hangared. A preflight inspection was done prior to the flight as well as a safe trip prayer. As the wind was out of the North, we departed Runway 36 at about 11:40 and reached an altitude of approximately 1000 AGL when I completed a turn for left downwind. There was a loud crack and an immediate vibration commenced in the engine. I pulled back on the power. The plane was level the started to sink. To avoid power lines in front of me, I attempted to give it some power but the engine did not respond. There was no thrust. Next, I pulled the power back again and turned sharply to the left. The power lines were cleared. About 150 feet AGL, I attempted to level the plane and raise the nose to arrest the descent and stop the turn. The elevator and the ailerons were not responsive. The plane continued to turn and drop rapidly. My best guess is that we fell straight down about 50 feet. We dropped nose down into a ravine in a field behind my neighbor's house at [REDACTED] This was approximately 740 feet due West from the end of Runway 36. It was after the accident that my neighbor, Carol Kennedy, called and said she saw something flutter into a tree near the front of her house and an object fall to the ground in front of her house when the engine sound "stopped". The object in the tree was the passenger's knitted hat. It's top was "chewed up" and there was an area in the shape of a line that was burnt/melted. the object in her front yard was a propeller blade

RECOMMENDATION (How could this accident/incident have been prevented?)
