Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Horizontal Stabilizer Damage, Propeller Damage, Engine Damage. There may be additional Items Damaged, the last I saw the airplane it was dark and could only see the obvious damaged items.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The planned IFR Flight was from KPIR to KPWK. I departed at approximately 2:40 P.M. Central time from KPIR. The flight was going smoothly (all instruments in the green). At approximately 5:15 P.M. I started noticing the oil pressure was down in the yellow arc, all other instruments were looking good. At that time I was IMC and the sun had set. ATC instructed me to descend to 2,500 Feet MSL. Upon reaching 2,500 I heard a loud bang and the cockpit filled with smoke. At that point the engine was completely dead. I then set best glide and turned toward the nearest airport (C81) and declared an emergency. Once I broke out of the clouds (roughly 700 Feet AGL) I searched for the airport and finally found it slightly to the right of my nose. I then saw runway lights and lined up with those. I quickly realized I was not going to make it all the way to the runway. Being very familiar with C81 I knew that what I was going to land in was some sort of wetland with tall grasses, so I opted to leave the landing gear up. I maintained my glide speed and put it down in the wetland, slid across a over run bridge that goes over a creek and came to a stop on the runway. I relayed a message to Chicago approach through a passing jet to inform them that I was safe. I then called 911 and waited for the local Police to arrive.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The part that failed was an internal engine part that was installed/inspected 1 year prior. It is not an annual inspection item to my knowledge. I do not believe anything could have been done different to prevent this failure.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
