(SEE ATTACHED LETTER)

11/28/17

I am James A Bilello (AKA Tony Bilello) I am reporting an accident that occurred on 11/20/2017 around noon on a County Road east of Denver, CO.

I fly an Ercoupe (3067H) out of APA. A friend, who, had recently quit flying because of his health, had given me his Bose ANR headset as a gift. I wanted to take a short hop to hear how it worked.

I was cleared for takeoff from 17L straight out departure and then a left turn at Lincoln Ave and headed east. It was a very calm day with no turbulence through 7,000' I went just past Smokey Hill Road and County Line Road and was getting ready to turn back to APA. I did a Lazy 8 over County Line and was turning west when the engine quit. I was at about 7,500' at the time. Several restart attempts did nothing, so I looked for a landing spot.

The terrain was "Prairie" with numerous small hills and, from what I knew from past hikes out east, the ground was lumpy. I decided that County Line was a better choice if traffic would allow it. There were three or 4 cars coming down a hill from the west and two widely spaced cars about 3 miles out east of me heading west. I chose to land east into the last reported wind at APA and away from the cars to the west.

I landed on County Line Road with no problem at about 65mph and well clear of cars behind me. The first car coming at me was about 3/4 to a mile away. It was a Jeep on the low-priced end of their line that kids seem to favor over the Cherokee and Grand Cherokee. He did not seem to be aware that a plane had landed up the road ahead of him.

By this time, my engine had stopped windmilling, but I was still rolling at about 40 mph. I decided it was time to make a right turn and get my left wing out of the Jeep's way and leave the highway. I did that at a spot where there was a road sign just off the road. My right wing knocked that sign down and left the airframe. The plane continued through a barbed wire fence and stopped about 40 yards off the road. I shut off the Mags and all switches. I think I shut off the gas as well.

Shortly, the County Police arrived and an EMT van showed up and checked me out. There was no injury or bruising or complications of any kind that have showed up since the accident.

With the help of the County Police, we were able to contact Beegles Aircraft Service in Greeley. We made arrangements to have the airplane removed the next morning from the field and taken up to their shop in Greeley, CO. That was done.

Respectfully submitted,

James A Bilello

Denver, CO 80227-3817

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

1. IT WOULD BE GOOD TO HAVE A FUEL FLOW INDICATOR OR A LIGHT TO SHOW LACK OF FLOW FROM THE WING TANKS TO THE HEADER TANK.
2. IT WOULD BE GOOD TO HAVE A RELIABLE FUEL QUANTITY INDICATOR IN THE HEADER TANK
3. IT WOULD BE GOOD TO INSTALL AN ELECTRIC BACK-UP FUEL PUMP BETWEEN THE WING TANKS AND HEADER TANK.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

1. ENGINE DRIVEN FUEL PUMP
2. AERO ACCESSORIES (AC)
