*lineman
who fueled
plane*

December 5, 2017

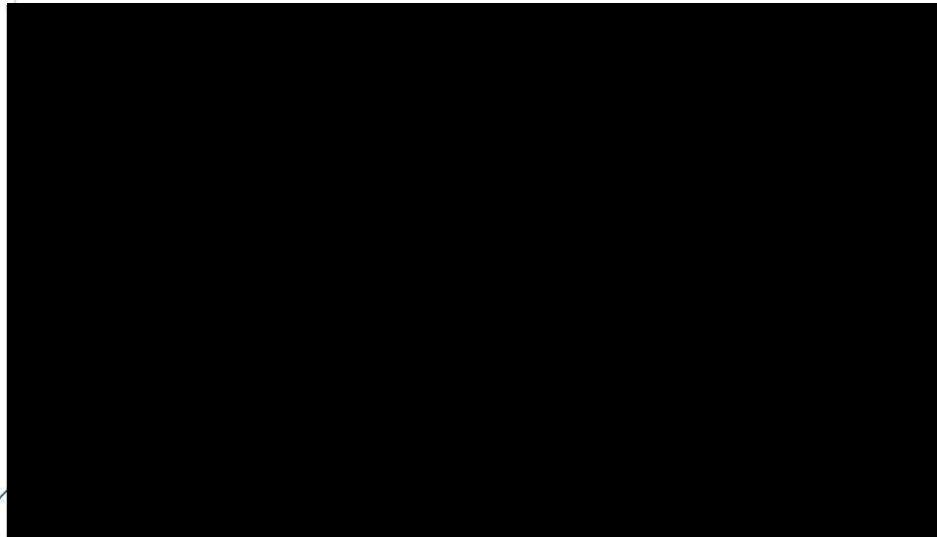

On December 1, 2017 a King Air 90 landed at Kissimmee Jet Center at some point after 9:30PM.

Jeannie Hepler called customer to see if the brakes were left off so lineman could move aircraft. At this time, the pilot told Jeannie he needed fuel.

I fueled the faded colored King Air with 75 gallons in each tip equals 150 gallons in total. Tires were fine, the fueling was a normal fueling.

Seemed to be fine, and nothing out of the normal.

December 5, 2017

On December 1, 2017 a King Air 90 landed at Kissimmee Jet Center after 9:30PM. The next day, the plane needed repositioning, so I called the customer Ed Noakes, to make sure the brakes were off. It was at this time, Mr. Noakes asked to have fueling done on December 4, 2017. The order was for 75 gallons in each tip, which totaled 150 gallons. (see attached sheet). This was not the first visit for Mr. Noakes, and family to arrive at Kissimmee Jet Center.

I cashed Mr. Noakes out at the time of departure, which was December 4 at 2:23PM. He seemed alert, He was with 2 teenage girls, and 1 teenage boy. To my knowledge, there were 4 people onboard the King Air 90 with tail number N500KR.
