NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Test flight as follows at: 3VS (Roy Otten MEM) Versailles Missouri

- Started engine to taxi to run-up area, performed a standard run-up as per POH, rpm, mag, brakes, flaps, all in green as required.
- All was good for test flight.
- At the 3VS runway 25:
- Performed a takeoff/abort run,
- Back taxi for a full takeoff
- Did a full takeoff and stayed in pattern and did a touch-n-go. At this time, I did a climb out and at about 400 feet, I lost full power (there was a loud bang heard by my AP and by-standers).
- Did an emergency check of switches and fuel within 5 seconds and then found a field to land in. This was about .75 miles west of runway. Just off of MO HWY 52, I did an off-airport landing in a cut bean field.
- During the landing, the aircraft hit some marker posts.
- There was damage to the aircraft .
- There was no field damage or crop damage.
- No personal injury.
- Three by-standers were working on a trailer and heard and seen the landing. They came over to me and ask if I was ok.
- I called my AP and told him of my location. When he showed up, we removed the hood cowlings and found where a B-nut was supposed to be; it was missing. After investigating, my AP found the missing B-nut between the number 3 and number 5 cylinders. One of the guys working on a trailer had a finger retriever and we got it out and reinstalled the B-nut.
- At this time, I tried to restart the engine and it started right up. Our investigation appears that the failure was the B-nut.
- I contacted the police in Versailles and they came out and blocked the road.
- I taxied the aircraft back to the airport hanger.

AP started to inspect aircraft for damage.

Note: Prior to this incident, this engine was removed and shipped to Wester Skyways for a complete overhaul under W/O 52142. The engine was shipped back and reinstalled into the plane.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Western Skyways

Did not do a proper secure of the B-NUT after doing the rebuild and test run up of the motor. and doing the fuel pressure test.
