NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We had departed from KBPT enroute to KUYA. Passing through 18,000 ft., both generators failed and would not reset. Battery power was rapidly deteriorating, we declared emergency, 7600 on transponder, chose EFD as nearest airport and descended to VFR over airport. No comm or Nav capability on radios due to complete electrical failure. Executed emergency gear extension, circled airport until emergency vehicles were spotted. Briefed for emergency exit procedure, expected a belly landing with no gears down. To our surprise, the main landing gear was down and locked. As they touched runway, we pulled STOP-FEATHER controls, which turns off fuel and feathers props. Nose gear did not come out, so nose of aircraft contacted ground and we slid down centerline of runway approx 1/2 mile. We exited aircraft through main entry/exit door asap and got clear of aircraft as emergency vehicles arrived.
