Event Statement Concerning
N600HH on 2-8-2018

I Mike Fleming on 2-8-2018 went with my nephew, Jim to Creve Coeur airport (1H0) with intentions of relocating my airplane N600HH to Woodland air strip (M489) about 30 miles.

We arrived early at (1H0) approx 8:30 AM on a nice clear day to move the plane to its new home base (M489) on arrival at Creve Coeur (1H0) I started my inspection of the aircraft. After approx 1½ hours I completed a very thorough inspection of the aircraft. I discussed with my nephew my procedure as to what I was going to do.

I started the engine and taxied to the ramp, noted a little gusty southwest wind. I did my run up and checked mags and carb. heat. I announced my intentions to depart on runway 16 on unicom 122.8 moved on to runway 16 and took off. I made my 1st right turn at about 700 to 800 ft. and second right turn at approx 1100 ft down wind of 16.

I had mentioned to Jim about making a couple of touch and goes on turf runway 24.

After clearing end of 16 I turned to make right turn over river for down wind for 24, and announced my intentions to make touch and go on 24 turf and did so twice.

I then flew northwest at approx 1500 ft. till clear of T.C.A.. after clearing T.C.A. I went to approx 2500 ft.

On approach to MU89 I started bleeding off alt. and dropped to approx 1400 ft. as I saw runway. I cont. to decrease speed to approx. 85 or 90 M.P.H. and continued my decent to approx 50 ft. A.G.L.

I made one pass down runway 27 at MU89 again noting a slight southwest choppy cross wind. Looked runway over everything looked O.K.

Pushed throttle back in approx 1400' turned left & left again to make down wind for 27 turned left to make base leg and left for final approach.

Lined up to left side of runway 27. Slowed to about 90 miles/hour with one notch of flap. I wanted a little speed because of gusting $\frac{1}{4}$ wind on final. I checked rate of descent looked back up to see a small tree tip near right wing tip.

I pushed stick to left and at that speed I clipped the tip of right wing, it turned the airplane slight right. Then I saw alot of small limbs and they started hitting the airplane. There was no control left on the stick, I realized I was going down and I saw the wind screen breaking and pieces started hitting my face. I closed my eyes and alot of loud noises from inside the plane from tree limbs hitting the plane.

In just a couple seconds the plane stoped. I opened my eyes to leaves and the ground in front of me. The plane was vertical and I was hanging in harness. I wiggled my toes & fingers I reached down with my left hand and flipped the release on my harness, which I dropped two feet to the instrument panel.

I tried to crawl out thru open wind screen area but my right hand would not work.

My wife and neighbor arrived and proceeded to pull me out of the wind screen opening. They moved me away from airplane area.

P.L.B. was actuated.

E.L.T. was not actuated.

911 was called.

Paramedics and fire truck arrived within minutes.

I was taken to Mercy Hospital at 610 New Ballas Rd.
