Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft is a total loss.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I will do my best to explain the events here but unfortunately there is much I do not remember about that day. I cannot remember anything clearly after beginning to taxi. The crash was a rather traumatic thing to experience I'm sure and that could be why I cannot remember the moment of impact and the events leading up to it. The memories I do have that day I do not feel like I can even be sure of because of the high doses of morphine I was given for many days. I was experiencing morphine induced hallucinations during the period of time that I was trying to make sense of what had happened.

The following is what I can remember and what I have learned from witnesses and video of the take off.

I remember purchasing the ultralight and doing a preflight on it. Then after strapping in I was checking the controls when the former owner asked me if he could take it up one last time. I was glad to allow him because the field was muddy and rough and I wanted clarification on where the runway was. he took off successfully and returned. while he was in the air I checked a wind forecasting app on my phone. it showed that the wind was out of the north at ten mph which was consistent with what I was observing. It also showed that sometime in the next three hours the wind would be out of the south east at 15 mph. when I was getting strapped back in he told me to not go any farther down than he had due to it being very muddy. I remember being able to see tracks of his turn around and can remember turning around in roughly the same area. That unfortunately is where I stop having any clear memory I can rely on to be accurate. Witnesses at the scene said that as I was taking off traveling to the north there was a sudden gust of wind out of the south east.

There is also a video of the take off that seems to support this. The video shows the aircraft rotate and leave the ground as a wind can be heard. The aircraft then banks left and seems to be in a stall. It doesn't however show the impact with the tree top. I thought for a time I could remember seeing my airspeed indicator showings a sudden and distinct drop but in that memory there was no quick bank to the left as is seen on the video so I do not know if I can trust that.
