Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Aircraft flipped on impact, damaging top wing and ripping off landing gear.

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Departed Herman Strip at 1800 with my 28th load of dry fertilizer for the day, with 11 loads remaining. The plane was flying well with no issues, weather just about perfect with little to no turbulence, and I felt well rested and mentally sound. After breaking ground and the plane flying well, I reduced the throttle from 35" to 32" and began to turn towards the field where I was applying the fertilizer. Halfway through the turn I noticed a slight shudder and a reduction in engine power, but no backfire, surging, sputtering etc. The MP gauge still indicated 32" and the prop at full RPM, but I elected to turn back towards the strip and make a precautionary landing. Almost instantaneously, it felt like I was making no power, and I leveled the wings, ~~pushed~~ pushed the stick forward, and opened the hopper door to drop some fertilizer before landing. Upon landing I hit a rice levee which knocked the landing gear off and bounced the plane into the air. When I hit the ground again, I was nose low which flipped the plane and I slip backwards for 30 ft before coming to a stop. I got out immediately and ran back as a safeguard in case of engine fire, which there was none. I had approximately 30 gal of fuel onboard, and intended to get fuel in 2 more loads.

Operator/Owner Safety Recommendation

If I continued straight ahead instead of turning, I might have had more forward energy and been capable of making a better emergency landing.

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Unknown, engine just quit making power.
