Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft has damage from the gear up landing in the corn field, this is still being determined by Myer's Aviation. The corn field really has no damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I left KOKM in the afternoon of the 5th of May to go home for the weekend on an IFR flight plan, destination WN09. The flight was going fine every indication as normal, cruising at 7000 feet. Just south of Wisconsin my engine had a catastrophic failure and sounded like a rattle can with no power, oil must have escaped the engine as I was getting smoke in the cockpit and outside. I immediately notified Quad city ATC and declared an emergency and asked for assistance to locate an airport. They told me the only airport nearby was a private strip 10 degrees off my nose, I turned to that heading as gliding at best glide speed, the prop was still free spinning at the time, shortly after it quit spinning at all, I then turned the gas selector to off. ATC said they wanted to call the airport and ask permission to land, they also were trying to see if I could switch to another controller, then decided against it. I asked if I was still on course for the airport and they said I had flown over it, next closest was like 11 miles away. I told them that was not an option and I would be making an offsite landing, I believe I lost them because there was a Cirrus that started to relay information to them from me. I found a potential road to put down on, but it proved to be unsafe, narrow, power lines on one side and fence on the other, so I retracted the landing gear and decided to land on the field right next to the road. I put down safely and let the Cirrus know that I was okay and on the ground, they relayed to ATC.
