Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft left wing tip and empennage damaged beyond repair.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Weather and Notams check approximately 1940L Chicago time. Planned 2020 takeoff for route 06C-KLOT-KHUF (1hr enroute). Takeoff on 06C runway 11 left downwind departure per local procedures accomplished. On initial climb to 1600msl lost power to engine. Decided to make left base back to 06C. Assessed into wind glide that it was best not try to return to airport due to civilian congestion. I decided to head for know open fields downwind. Landed in soft field, aircraft somersaulted landed up right. I exited and called 911.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I have flown out of 06C many times. Runway 29 is most often used due to prevailing winds. I had always "hip pocketed" the fields west of Schaumburg as viable emergency fields. The fields were not necessarily plan B for departing 11 but glad I had something to work with.

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
