

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Wichita State: Ks

ZIP: 67217 Country: USA

Latitude: 37°39'5.93"N Longitude: 97°23'1.81"W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 05/28/2018 Local Time: 12:10pm
mm/dd/yyyy

Time Zone: Central

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N64176

Manufacturer: Fairchild

Model: M-62C (PT-23-HO)

Serial Number: 256-HO

Year of Manufacture: 1943

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

- ☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 2900 lbs

Weight at Time of Accident/Incident: 2530 (approx) lbs

Number of Seats: 2 Flight Crew Seats: 2

Cabin Crew Seats: _____ Passenger Seats: _____

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
☐ Aerobatic
☐ Balloon
☐ Commuter
☐ Transport
☐ Utility

Special

- ☐ Restricted
☐ Limited
☐ Provisional
☐ Special Flight
☐ Experimental
☐ Special Light-Sport
☐ Experimental Light-Sport

- ☐ Certificate of Authorization or Waiver (COA)
☐ None ☐ Unknown

Landing Gear

(Check all that apply)

☐ Retractable

- ☐ Tricycle ☒ Tailwheel
☐ Amphibian ☐ High Skid
☐ Emergency Float ☐ Skid
☐ Float ☐ Ski
☐ Hull ☐ Ski/Wheel

☐ Other Launch/Recovery System

☐ None ☐ Unknown

Engine Type (Select one)

- ☒ Reciprocating ☐ Liquid Rocket
☐ Turbo Shaft ☐ Solid Rocket
☐ Turbo Prop ☐ Hybrid Rocket
☐ Turbo Jet ☐ None
☐ Turbo Fan ☐ Unknown
☐ Electric

Fuel System Type (Reciprocating)

- ☒ Carburetor ☐ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Rated Power ☒ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)
Eng. 1	Continental	W670-16	16475	1943	220	1969.9	16.7	1395.4
Eng. 2								
Eng. 3								
Eng. 4								

Last Inspection Type

- ☐ 100-Hour ☐ Continuous Airworthiness
☐ AAIP ☐ Conditional Inspection
☒ Annual ☐ Unknown

Date Last Inspection: 04/01/2018
mm/dd/yyyy

Airframe Total Time: 1391.1 hrs
hours measured at (Select one)
☐ Last Inspection ☒ Time of Accident/Incident

Type of Maintenance Program (Select one)

- ☒ Annual
☐ Conditional (Amateur-built only)
☐ Manufacturer's Inspection Program
☐ Other Approved Inspection Program (AAIP)
☐ Continuous Airworthiness
☐ Other, specify: _____

Description of Fire Extinguishing System

- ☒ None
☐ Specify: _____

Propeller 1

- ☒ Fixed Pitch
☐ Controllable Pitch
☐ Ground Adjustable

Manufacturer: Sensenich

Model: W90LA-78

Propeller 2

- ☐ Fixed Pitch
☐ Controllable Pitch
☐ Ground Adjustable

Manufacturer: _____

Model: _____

ELT Installed: ☒ Yes ☐ No

If Yes:

ELT Manufacturer: _____

Model or Part No.: _____

TSO No.: ☐ C91 (121.5 MHz) ☐ C91a (121.5 MHz)
☐ C126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☒ Yes ☐ No

If activated:

Did ELT Aid in Locating Aircraft: ☐ Yes ☒ No

If not activated:

- Indicate Reason: ☐ Impact Damage
☐ Fire Damage
☐ Battery Expired/Damaged
☐ Unknown

Additional Equipment (Check all that apply)

- ☐ ADS-B
☐ Airframe Parachute
☐ Angle of Attack Indicator
☐ Autopilot
☐ Data Recorder
☒ Electronic Flight Bag or Handheld Device
☐ Electronic Multifunction Display
☐ Electronic Primary Flight Display
☐ Handheld GPS
☐ Heads Up Display
☐ Onboard Weather
☐ Satellite Tracking Device
☐ Stall Warning System
☐ Video Recording Device
☐ Other, Specify: _____

OWNER/OPERATOR INFORMATION**Registered Aircraft Owner**Name: American Airpower Heritage Flying MuseumCity: DallasState: TXZIP: 75376Fractional Ownership Aircraft: ☐ Yes ☒ NoCountry: USA**Operator of Aircraft**☐ Same As Registered Owner☐ Same Address as Registered OwnerName: Commerative Air Force, Jayhawk WingCity: Wichita

Doing Business As: _____

State: KSZIP: 67217

Air Carrier/Operator Designator (4 Character Code): _____

Country: USA**Operating Certificates Held**

(Check all that apply)

- ☒ None
☐ Flag Carrier Operating Certificate (FAR 121)
☐ Supplemental
☐ Air Cargo
☐ Foreign Air Carriers (FAR 129)
☐ Rotorcraft External Load (FAR 133)

DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☒ Substantial
☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Right landing gear, right outboard wing sheared from wing. Leading edge damage to left wing, leading edge damage to right inboard wing.
Fence line damaged at impact site, lights and or camera's on property were knocked off of pole(s).

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

The Memorial day flyovers consisted of four planes: The UC-78 Cessna Bobcat, a Cessna 182, a Fairchild PT-26 and the Fairchild PT-23. The Bobcat and 182 were flying one route while the PT-26 and PT-23 flew the second route.

We started off with a mission briefing about 8:30 to discuss our flight plans. We were a two ship for part of the day. Then we would join up with the Bobcat and the 182 to finish things up. We took off approximately at 9:20-9:30 and headed to our first flyover spot, Winfield Veterans Cemetery. We did two orbits around our initial point at Winfield before proceeding inbound over the cemetery. We then flew up to Derby to overfly El Paso Cemetery; we flew one orbit at our initial then proceeded inbound over the cemetery. Next we flew to north east Wichita for our next flyover at Lakeview Cemetery; we flew 2 large orbits (about 10 minutes) before proceeding inbound to overfly the cemetery at the assigned time. We then flew west to join up with the Bobcat and 182 to complete the flyover at Resthaven Cemetery, we made two passes over Resthaven. At this point the PT-23 and PT-26 went towards our last flyover location of Bluff City while the Bobcat and 182 went to overfly another cemetery southeast of Derby. We joined back up together just north of Bluff City to perform our last flyover, we did two passes at the Bluff City Cemetery. Then we returned to 71K.

The whole mission went very well. Through out the mission I monitored my fuel and switch tanks back and forth. About 5 minutes from 71K I switch to what appeared to be the fullest tank, I don't remember which. Both tanks were low, but both were above "E". On short final the engine lost power, it seemed to me like it was running out of fuel. We were about 150-200 feet above ground, full flaps. I immediately switch tanks and starting pumping the wobble pump. I did this because the way the engine lost power seemed to be fuel related. I did not know if it was a lack of fuel or something wrong with engine driven fuel pump. Knowing that I had switch tanks a few minutes prior, and that I should have 7 to 10 gallons of fuel on board, I switch tanks to where I knew there should be fuel and I used the wobble pump to provide fuel pressure if it was a problem with the fuel pump. The engine came back to life we leveled out for a second or so. Engine failed again, I started pumping, it came back momentarily and I kept pumping until we were committed to an off field landing. During this whole time I kept the plane pointed towards my intended landing area (71k), grass runway that is adjacent to the paved runway, while adjusting our path to the open spot in the business yard we were flying over. Once we were roughly 5 to 10 feet in the air the airplane was slow enough to loose lift and dropped, bouncing on the mains just past a parked truck. We went airborne again and with the bounce and crosswind from the southeast we drifted enough to the west for the right wing to impact a metal pole that is just south of the fuel pumps. The impact knocked/sheared the right outboard wing off. Sometime before impacting the chain link fence at the south end of the property we touched down again, I tried to steer left but not sure how much I was able to. We impacted the fence, the remainder of the right wing impacted a wood utility pole, this caused us to spin 90 degrees roughly to the right where we came to a stop in a nose down attitude. Once the plane stopped and I did a quick self-assessment (nothing broken, I could move and was aware of my surroundings) I turned off the mags, master and moved the fuel selector to the off position which if I remembered correctly is with the handle rotated to the down position, long part sticking up. I don't recall exactly which order I turned them off in. I took off my flight helmet/headset, released my buckled, checked on my passenger, she was ok. I got out of the plane and checked for any immediate danger to us or the plane. There was none, fellow wing members were on their way to assist us, my passenger stay seated until they got there to help her out. From the best I can "guess" the total time from initial engine loss of power to when we came to a stop was probably at most 10 seconds. Although it seemed like a lifetime while it was happening. At the time of the incident we have been flying for roughly 2 hours and 41 minutes.

I had last flown this aircraft, PT-23, N64176 on Wednesday May 23, 2018. Upon return both myself and our operations officer Ben Sorensen filled both tanks in preparation for the upcoming Memorial day flight. We then put the plane in the hangar. On Monday morning during preflight I verified the fuel gauges that they both showed full and the hobbs counter showed the same as when we put the plane away.

Continued below:

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

This could have prevented if we had landed for fuel at some point during this overfly mission. A fuel stop could have been made between the El Paso Cemetery in Derby and the Lakeview Cemetery in east Wichita we were 3 miles from Jabarra (AAO). Could have stopped for fuel immediately after the Resthaven flyover. We were 5 miles from Westport (71K) after that portion of the mission. Could have also landed at Anthony (ANY) 13 miles away directly after the last flyover location. If I had know that I was burning fuel at higher rate than calculated I would have made a fuel stop and put on more fuel. Unfortunately I did not realize that and this airplane does not have any kind of fuel flow meter/gauge/counter. Although we are planning on adding that on the rebuild!

Another way to prevent fuel starvation in this type of aircraft is to make it SOP that at one hour prior to estimate fuel exhaustion, require a fuel stop.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

FUEL & SERVICES INFORMATION**Fuel on Board at Last Takeoff**

(Convert from pounds, as necessary)

49.45 usable _____ Gallons

Fuel Type

☐ 80/87

☐ 100 Low Lead

☐ 100/130

☐ 115/145

☐ Jet A

☐ Jet A-1

☐ Jet B

☐ JP8

☐ Automotive

☐ Other, specify _____

Other Services, if Any, Prior to Departure

topped off the Oil tank, put in 3 quarts.

EVACUATION OF AIRCRAFT

Was an emergency evacuation of the aircraft performed? ☒ Yes ☐ No

Method of Exit – Describe how the occupants exited and how many occupants evacuated each location

I climbed out of the front cockpit first after verifying my passenger in the rear cockpit was OK. I checked for any immediate threats to us, there was none. People from the airport assisted my passenger in climbing out of the rear cockpit.

OTHER AIRCRAFT – COLLISION (If air or ground collision occurred, complete this section for other aircraft)

Aircraft Registration Number

Manufacturer: _____

Model: _____

Damage to Other Aircraft

☐ Destroyed ☐ Minor

☐ Substantial ☐ None

Registered Owner of Other Aircraft

Name: _____

City: _____

State: _____ ZIP: _____

Country: _____

Pilot of Other Aircraft

Name: _____

City: _____

State: _____ ZIP: _____

Country: _____

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Continuation of: "Narrative History of Flight" from above.

To the best of my knowledge I had onboard at the beginning of the flight 45 usable gallons of fuel. I use ForeFlight to calculate my fuel usage and to keep track of our flight as I was flying lead. The performance information I had it programmed with used a fuel burn of 14GPH which would give me roughly 3 hours and 12 minutes of total time. Unfortunately I do not recall the total estimated flight time from ForeFlight on Monday morning, but with a zero wind calculation estimated time/fuel required to fly the route without any holds was 2 hours at 28.4 gallons of fuel. The actual flight time according to my track log within ForeFlight at time of accident was 2 hours, 41 minutes. Total hobbs time on the plane was 2.9 hours. The hobbs meter on this plane is active whenever the "Master" switch is on. Myself and Col Earl Long who was flying his PT-26 and I estimated before the flight that I had approximately 3 hours and 15 minutes of total flight time available in the PT-23. Between seeing both the gauges above "E" and our estimated 30 minutes of flight time remaining I was not expecting any fuel issues. If I had realized how low of fuel I was I would have diverted to Anthony Ks (ANY) to get fuel before returning to 71K.

Earl Long is the Wing's Maintenance officer as well as the owner/operator of Westport (71K) and licensed mechanic. I trust him explicitly when it comes to his advice on any of the aircraft I fly.
