Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Substantial damage to the RT wing, loss of tail wheel and landing gear, propeller bent, Ag spraying equipment torn off, LT wing with damage on the end, tail and rudder are bent to the left.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Occurred on privately owned grass runway. Grass was trimmed and no moisture present. Pilot had been completing ag spraying since the morning. Attempted to take off with a load to spray after completion of pre-flight check out. Plane reached 70-80 mph, leaving the ground when the plane quickly whipped to the left with a height of approximately 8 feet. Plane veared to the left and tipped to the left with the left wing striking the ground with the plane then coming down on the landing gear and sliding sideways and ending with the right wing striking the ground and plane upright. Pilot was holding the control stick in the center during the time of take off and the control stick was maintained in the center through out the accident.
