Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

2Ft of propeller broke off in straight and lvl fit at 2400 rpm. resulting in severe damage to prop, engine, upper and lower engine cowl, fire wall, and engine frame. minor cosmetic damage and landing gear damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We left KLVJ (Pearland) heading south at approx 1100 central. Lesson plan that day was instrument training. We were flying near the coast close to Lake Jackson. I was instructed head north 36 degrees climb to 3000 ft and maintain heading. Once I reached altitude, I was instructed to simulate being in a cloud. So I did a 180 degree left hand coordinated 30 degree turn. Now heading south I was instructed to drop down to 2000 ft and level out. Once level I checked instruments we were cruising at around 2400 rpm when half of the propeller sheared off. I quickly pulled back the throttle then the mixture, killing the engine. After that my Instructor took over the acft. He pointed the acft into the wind and we look for a place to ditch. Luckily, we were flying over Clemens prison's crop fields. We ended up in their cow pasture. Disired destination would have been KLVJ.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

If propeller had a mandatory NDT insp every certain amount of hours or time, maybe. maybe issue a service bulletin for props this age. Otherwise, this couldn't have been prevented.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
