Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Right wing bent at strut, nose gear torn off, left wing tip broken, tail behind cargo bent substantially, one side of prop bent, probable hull & fire wall bend.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed KFRX approximately 8:30 am eastern time, proceeded to next destination KPMH for first stop for fuel. Received fuel from the FBO at KPMH. Did a quick look at airplane after taking a break for a few minutes. Had a little trouble starting the airplane. Airplane started after waiting a few minutes and trying again. Taxied to hold line at the runway. Did a run up in which everything seemed normal. Took off from KPMH. About 15-20 minutes into the flight the engine sputtered slightly - I enriched the mixture and the engine cleared up. Continued the flight for the next hour to hour and 15 or 20 minutes without problem. I had ~~since~~ ~~learned~~ the in the meantime learned the mixture and set RPM to 2200 - 2300 RPM for cruise. After the 1st 15-20 minutes the engine started sputtering again and lost RPM. About halfway in this time I switched to right tank. When the engine started sputtering I enriched the mixture again and switched back to both tanks which I felt helped for about 20 seconds. I was looking for a place to land and had circled back to a private airstrip. The engine kept losing power and finally dropped to @ 500 RPM. I realized I was too high and fast for the private strip so tried for a field next to it where there were trees. Then I turned for another field and was about to land when we saw power lines. I turned right and struck.
