NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I loaded my family and started the plane on Saturday morning, it started then died. I then turned the low boost on and started the plane again. I then turned the low boost off and taxied to the Run up area. I ~~waited~~ I let it idle for 5 minutes to warm up and performed the Run up. Everything checked fine and I proceeded to Run 17. I proceeded to take off and everything seemed Normal. It took @ 1/2 of the Run on @ 2000 ft. once I had a positive Rate of climb, I took the flaps out and then brought the gear up. Shortly after that, I think I heard the engine miss and it felt like I was losing power, I then turned the low boost on again and started turning back for the airport, that did not help anything and continued losing power until the engine died. I think I was @ 200 off the ground and decided the best place to land would be in the corn field in front of me as I got closer to the ground I had to pull up to clear a pivot and then I lost airspeed and ~~set~~ had a little harder landing than I might have had had I not had to pull up to clear the pivot. We hit the ground and slid a ways on the belly, when we came to a stop we were level. I talked with everyone and made sure they were all right and then called 911. soon the rescue squad and airport mechanics found us and got us out of the plane and to the Hospital.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Not sure how this could have been prevented

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Not completely sure, but might have been the turbo wastegate controller. Engine is at Continental Right now for testing
