NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Pilot was flying from Wausau, Wisconsin to Tel City, Indiana. Pilot departed at 6:00 p.m. (est). He intended to refuel at Tel City approximately 430 nautical miles away with a ETE of 4 hours and thirty minutes.

When pilot first departed Wausau, the sky was overcast; ceilings were VFR. As pilot passed into Illinois, the clouds cleared and the sky remained clear for the remaining flight.

Approximately, 15 nautical miles north of Tel City at 2,500 msl, engine sputtered. Pilot checked throttle and mixture controls while turning to closest airport (HNB) and setting the plane to maximum glide speed. Engine quit. Pilot decided he could not make airport and scanned ground below. Pilot decided to land at lighted trucking parking area about one mile away. (Area turned out to be Master Brands cabinet manufacturer) Pilot made a slow 180 circle around and above emergency landing area to attempt to land between an open asphalt area between two rows of parked semi-trailers. As pilot was descending, he saw large, electrical poles along his approach route. To avoid these power poles, pilot slowly turned 90 degrees to land on an asphalt area adjacent to the large building. Beyond the asphalt was green space.

As plane was on the final approach, pilot put in forty degrees of flaps and maintained 40 mph IAS. Once pilot determined he would clear building roof, pilot slipped the plane slightly to the right to lose all altitude. Just before touchdown, pilot pulled back on the yoke. Plane landed hard. Plane did not bounce and skidded hard. Plane hit a rocky wrip-wrap embankment in front of the green area. Plane nosed over gently and stopped. Pilot and passenger were suspended in their seat belts upside down. Pilot asked passenger if he was alright. Passenger said that he was as he unbuckled and crawled out of the plane. Pilot unbuckled and crawled out of the aircraft. After pilot saw his passenger walking around, pilot laid down on the ground for he felt a slight twinge in his lower back.

Immediately, personnel from Master Brands company approached the aircraft and offered assistance to pilot and passenger. Police were on site within minutes followed by an ambulance with paramedics. Pilot and passenger were transferred via ambulance to Jasper Indiana Memorial Hospital. Both pilot and passenger had hit their foreheads on the plane dashboard/console, but neither lost consciousness.

Passenger was cleared and released within a couple of hours with a bump on his forehead. Pilot remained in the hospital for two days, suffering an L2 vertebrae compression.
