NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On the afternoon of July 28th, 2019 at 1947Z, I filed an IFR flight plan from the Iowa City Municipal Airport (KIOU) to the Appleton Airport (KATW) for a 2000Z departure with a direct routing.

I did not obtain services from Jet Air, Inc. at KIOU and chose to file direct because:

- 1) I was rushing to beat a line of thunderstorms moving east towards KATW
- 2) I had filed direct for a flight from KIOU-KATW just 2 days earlier on Friday, July 26th, and was cleared direct by Cedar Rapids Clearance Delivery as filed at my filed altitude of 3,000'

I departed KIOU at 14:56 CDT and picked up an IFR clearance airborne with Cedar Rapids Departure. I was cleared as filed, so I was surprised when Chicago Center issued a reroute DALEY V341 OSH DCT KATW and Madison Approach issued a second reroute. Had Cedar Rapids departure not cleared me as filed, I would have returned to the field for fuel.

Shortly after I cancelled IFR, on VFR flight following to 79C at 9,000', the engine stopped with the fuel selector valve set to the left tank. Both of the fuel gauges showed fuel above E. After running the Emergency Landing Without Engine Power checklist, I executed a forced landing into a field and exited the right door.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This incident could have been prevented had I immediately cancelled IFR when Madison approach warned that I would soon be instructed to climb and proceeded VFR to land at KMSN/KUNU/KFLD to refuel.
