It was about [3:30](#) when I got a phone call saying we had a phase to phase connection I pack my work equipment up and headed towards Lucas rd sending my eta as it changed when I arrive [around 4:40](#) I quickly unloaded my atv and started patrolling backwards from 27 to 24 looking for anything that could possibly but the line in danger, and as I topped the hill at str 25 a noticed a plane had wreck I made my way down to the plane and first thing I noticed was there were diapers everywhere I make sure the area is safe and yell towards the pilot to see if he was alive I got no response I walked closer to grab his wrist to see if there was a pulse I did not notice one and this is [around 4:50-4:55](#) I seen blood toward the middle of the plane so that made me believe there was a 2 person who got thrown out so I walked up the hill to look In the woods and in the trees couldn't find anyone but on my way down I noticed some pull bottles and other things everywhere and proceeded to call 911 [at 5:04](#) and waited for first responders
