Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

AIRCRAFT SEPERATED IN FLIGHT AT 14,000 FT MSL.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The aircraft was dispatched at 2049 CST. The pilot notified Bismarck Aero Center to pull the aircraft and add 25 gallons of Jet A+ per side. The aircraft departed KBIS at 2232. The aircraft took off and departed with no noted issues. The aircraft was cleared direct to KISN. Upon reaching cruise altitude the aircraft leveled off and began to accelerate. The aircraft then disappeared from radar contact shortly after. The aircraft wreckage spread out over a couple miles starting 18 NM NW of the KBIS airport. The winds aloft that night were reported out of the NW at 45 kts. The wind helped the lighter debris get blown farther back into the debris field. The debris pattern appears to include a turn to the east. Smaller items of insulation, and aircraft interior furnishings were found at the farthest point from the aircraft wreckage. The rudder weight and parts of the elevator were also found in this portion of the debris field. Farther into the debris field we found part of the left wing as well as the remaining wings. In this same area we also found a tip to a propeller. This same area also included the cockpit seats, MED Bed, personal belongings, all but 1 cabin seat, medical gear, and the pilots flight bag. To the north and west of that we found the cockpit. From the cockpit we found the flight paramedic face down still secured in his seat roughly 20 yards to the northeast of the cockpit. The pilot was found roughly 75-100 yards to the north and west of the cockpit. He was ripped from his seat. To the east of the cockpit we found the tail of the aircraft. The vertical was located with the tail wreckage and the elevator was not located with the tail. This area included the cabin baggage area to the cabin door. The left engine was located north of the tail section by about 75 yards. The right engine was located about 75-100 yards north and east of the cockpit. The flight nurses body was located roughly 25-50 yards in front of the left engine. She was also ripped from her seat.
