Subject: RE: Background info for Richard Lennard

Michael, please find attached the requested documents. Richard Lennard was a very good stick, Very nice individual and very smart. In doing simple hood work with the autopilot he was fine but Hand flying not so good and I stressed to him he must get recurrent often with hand flying and Partial panel. He seemed to understand the reason for it I never spoke to him after training. We Stress transitional training for the JetPROP but they are expected to keep up their proficiency.

I have called many of our customers about the schetched drawings on our proposed gross weight Increase and spoke to our owners about it at the Owners meeting at MMOPA and will be sending A copy of the letter I have sent you to all our customers over the next month.

Call any time if I can help. Sincerely, Darwin Conrad
