Subject: ForeFlight Information on Routes Planned
Date: Friday, March 20, 2020 10:05:03 AM

I found an account for Mr. Weiss, however it doesn't appear he filed a flight plan for this flight in N501CE through ForeFlight Mobile.

In the days prior to the accident flight he planned several routes using ForeFlight Mobile. If an altitude appears in a route string (eg: 8000FT) that was used by the app for calculating en-route times and fuel burns.

^^^

In the days prior to the accident flight he looked at information for several Airports:

^^^

He had not looked at Weather Imagery recently in the app.

Let us know if you need anything else.
