Subject: ForeFlight Re: NTSB request N5167L

Hi Paul,

[REDACTED] had a ForeFlight account, but the last flight plan he filed was on July 25, and that was the date of the last weather briefing we issued for it.

The last routes he entered into the app were:

```\n

Date/Time (GMT) Updated Route String

8/2/2019 13:46:21 KIWD KPKB N5167L 8500ft  
8/2/2019 13:45:41 KIWD KARR KPKB N5167L 8500ft  
8/1/2019 20:59:36 KGLR 83D IWD N5167L 8500ft  
```\n

He had not looked at any Weather Imagery in ForeFlight Mobile, though he could have been looking at live Radar or Satellite overlays on the Maps page.

The last airport he viewed was KASX on 8/3/2019 at 15:21:11 GMT.

Let us know if you need anything else on this one.
