No AFSS or Foreflight weather briefings, no flight plan.

Hi Don,

Thanks for your patience. We have a couple of pilots who have set-up an aircraft with Reg. N4658X in their accounts, but neither match on name or route of flight associated with this accident.

We did find an account that appears that it could be Mr [REDACTED]'s, but it was a trial account that ended in July, so no data was synchronized from the devices.

Best regards,

-Josh
