Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Most Horizontal surfaces on The Aircraft were Damaged in some way, mostly on leading edges. The nose gear was folded under as well as both main landing gear.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I called Mr. Stefan Mares, Pilot for a reported weather at approx. 1330 hrs and received a favorable report for a local flight.
 I completed my preflight at approx. 1345 and preheating my engine was also complete.
 I took off on Runway 9 at 94 knots shortly thereafter. I did my climb out and departed to the north for a slight over Lake Wisconsin and then I headed south to the village of Dune after which I flew west for several miles. I decided to head back to the airport for a full stop landing.
 I entered my downwind leg slightly east of the airport, 1/2 mile from the Runway. I got my speed below 100 mph and

I turn final lined up with runway 9 at 9WN5. My speed was approx. 65 on long final so I pulled the nose up ever so slightly to bleed off about 2-3 mph. I might have been fixated a bit on my speed and possibly had drifted North slightly. Ready To impact my Left Wing near
the Tip ^{TOP}

I hit the tree which spun the
aircraft around through 360 degrees.
at that point the nose dropped and
the aircraft impacted the ground. I
believe it fell at about a 60 degree
angle.

Local EMS arrived within a few
minutes and one of the EMS people
lifted me straight up out of the
aircraft and I was able with help
to walk to the backboard.
