Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

No damage to property. The propeller was bent and the lower engine cowling was bent during the nose over. The left wing leading edge and tip area were damaged. The tip of the vertical stabilizer was damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The flight originated from my home strip near Emporia, KS with a departure time just before 8:00 AM. My 9 year old daughter and I were going to meet some friends and have breakfast at the Beaumont Hotel. The winds were light out of the east.

The approach to runway 18 at Beaumont was normal and initial touchdown was normal. Just after touchdown the aircraft began to pull right and took a lot of left rudder to try and keep going straight, and continually got worse. As the aircraft continued to pull right, with full left rudder and full aft elevator I tried tapping the left brake a little also to try and straighten out and the tail came up, so I stopped using the left brake and used just the left rudder. As the aircraft was approaching the west edge markers of the runway the aircraft nosed over and flipped on its top.

I looked over at my daughter, who was staying amazingly calm, and I just kept telling her to give me just a little bit and I would get her out. I shut the master off and turned the fuel off, braced myself and undid my seat belt. My door had already popped open during the crash so I moved a few things that were on the ceiling, braced her and undid her seat belt and we departed the airplane. It was 8:30 AM.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Not sure.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

The right brake was locked during the landing. The cause of the condition is yet to be determined.
