Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

The aircraft's fuselage was damaged upon impact. The propeller and engine were detached from the airplane. The strut on the right side of the aircraft was ~~smashed and pushed back into the cockpit~~ broken in half and the wing tip was leaking fuel. Both rudder petals were smashed and pushed back into the cockpit. The aircraft doors had also ripped off. Most of the front of the airplane was destroyed.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On February 21st at 1400, my student and I departed 35R. We had completed every pre-flight action as normal including getting fuel from Denver Jet Center, weight and balance, checking oil etc. Everything was normal and looked good. Our run-up was complete by the checklist and within standards. So we proceeded to taxi to runway 35R. Shortly after takeoff and into the climb, we realized we couldn't climb or maintain an appropriate climbing attitude. I took the flight controls and put the flaps up and the nose of the airplane down to gain airspeed. At this point had no runway length left, but we were cleared Southeast. I knew we had a significant power loss and could barely maintain altitude. I told my student I had controls and I immediately turned for runway 10/28, maintaining a level pitch as best as I could. At this point, I couldn't maintain best glide speed, so I tried to avoid buildings and obstacles and make a path straight to the runway. Once I knew I had the runway made, I turned in for a landing on runway 10. As clear as I can remember, the tailwind made the airplane accelerated quicker than I could respond, low to the ground. We first impacted a taxiway sign then continued to roll. I do not remember the period between hitting the sign and coming to a full stop. I had hit my head on the dash. The trim control (electric) was also on my student's controls, so I couldn't get the nose up anymore, it was set nose down.
