Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Shortly after takeoff upon turnout engine sputtered and power was lost. Pilot attempted restart and 180 to return to airfield but unable to regain power or make the distance to airfield. Forced landing in a vacant lot with small trees and shrubs. Left wing struck a tree and plane swung 180 degrees on impact.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The left tank was virtually empty with sediment on preflight. Sediment had been sumped out til clear. Later inspection revealed much sediment remaining in tank. Pilot believes low fuel and sediment in left tank may have starved the engine during first turn when gravity pulled from left tank. More fuel on board would have probably been helpful.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
